

## ROTARY BRUSH MOWER

### EDGE® ROTARY BRUSH MOWER

The EDGE rotary brush mowers are designed to cut through the thickest brush and glide over rough terrain with ease. From heavy weeds, undergrowth, brush and small saplings up to 4" (102 mm) in diameter, the EDGE rotary brush mowers are ideal for clearing trails for horses, snowmobiles, skiing or biking in areas that would normally be inaccessible.

### OPERATIONAL BASICS

Rotary brush mowers will mow brush down, but won't bog down your mower. Available in widths from 48" (1219 mm) to 90" (2286 mm) for standard or high-flow hydraulic systems, the EDGE rotary brush mower is an essential tool for any land clearing project. Brush mowers feature a direct drive hydraulic motor requiring 8-40 gpm and a heavy duty stump jumper. Every mower comes complete with hoses and flat face couplers.
